### PC-free Slideshow

Simply save pictures\* and movies\*\* on a USB memory device, insert into the projector and your pictures/movies are projected automatically. The viewer can see beautiful pictures/movies as they are for a more dramatic impression.

\* EH-TW650 supports JPEG, PNG, GIF and BMP format.  
EH-TW5650 supports only JPEG format.

\*\* Movies (Motion JPEG) applicable on EH-TW650 only.

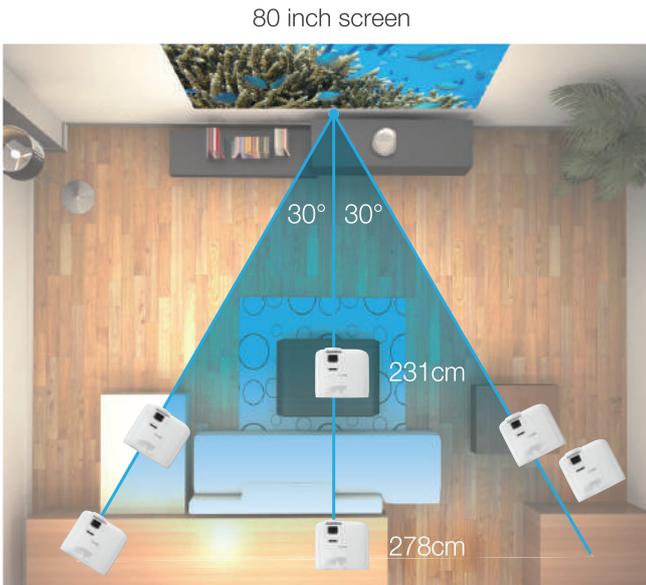

### Split Screen

Split screen allows inputs from two separate sources to be displayed side-by-side on the same screen, for example - you can watch your favourite cooking YouTube video and also the recipes of the dish side by side at the same time.

### Superior Placement Flexibility

With the zoom lens and keystone adjustment features, you'll have a broader range of placement possibilities. Fewer placement limitations mean it'll be easier for you to relax while enjoying your favourite entertainment on the big screen.

\* 235cm - 382cm for EH-TW5650.  
181cm - 219cm for EH-TW650.

### Availability of MHL Port

Watch your images and videos in your smart devices appear larger-than-life with the MHL port. Simply connect your MHL-compatible device with the MHL cable to fully enjoy your contents on the big screen. What's more, when connected, you can charge your Android smart device and operate it using the projector's remote control.

### Quick Start-up Time

EH-LS100 only

Equipped with laser light technology, the EH-LS100 starts up within 5 seconds, ensuring immediate projections that will cater to your home entertainment needs.

### 16W Built-in Speaker

EH-LS100 only

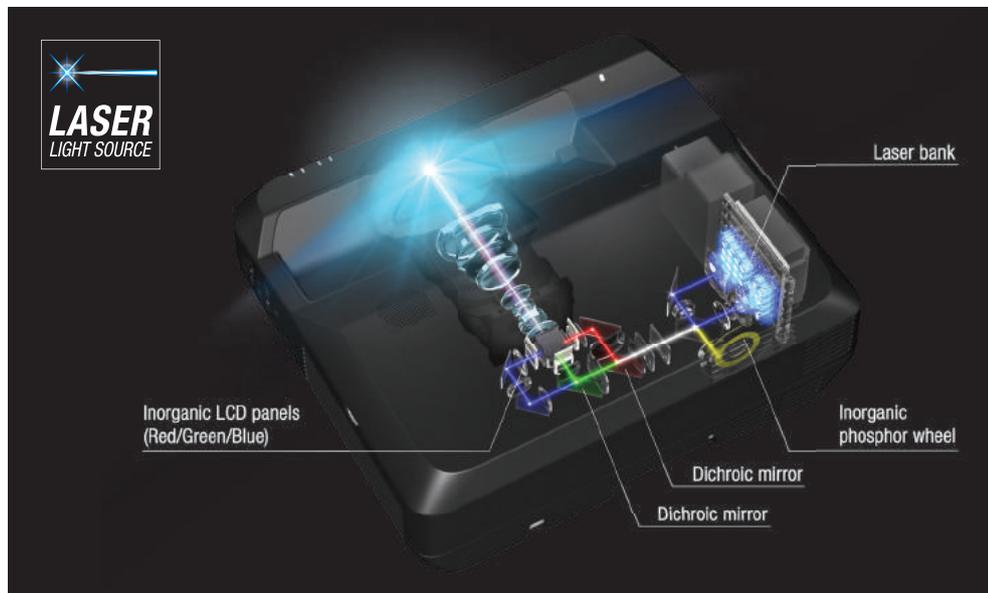

Enjoy dynamic audio from the built-in 16W speaker without having to connect to an amplifier or a separate speaker.

### Revolutionary Laser Light Source

EH-LS100 only

Blue light from the laser is projected through a beam splitter, which divides the light into two beams. One beam is reflected by a phosphor wheel, changing it into yellow, while the other beam remains blue. The two beams are then recombined into white light and separated into red, green and blue through dichroic mirrors. Each of the three colours passes through LCD panels, producing three individual images, which are transmitted through a prism and combined into the final full-colour image.

### 20,000 Hours Laser Light Source

EH-LS100 only

With a long-life laser light source that boasts a lifespan of up to 20,000 hours, this projector delivers TV-like usage hours for your viewing pleasure. To top it all off, through the aid of high-speed contrast controls, bright and dark scenes will always look phenomenal.

## Inorganic LCD Panels and Phosphor Wheel for Outstanding Reliability

EH-LS100 only

Made of inorganic material, Epson's newly developed phosphor wheel offers superior light and heat resistance to deliver excellent reliability. By combining this with our inorganic LCD panels, we create laser projectors that deliver vibrant images for extremely long periods

### Organic vs. Inorganic

	Inorganic (Glass, iron, aluminum, etc.)	Organic (Paper, wood, plastic, etc.)
 Light-resistance	YES 	NO 
 Heat-resistance	YES 	NO 

Unlike organic substances, inorganic substances do not contain carbon.

## Finely-tuned Colour

EH-LS100 only

The laser light source means that the correct colour gamut is fully realised at all times.

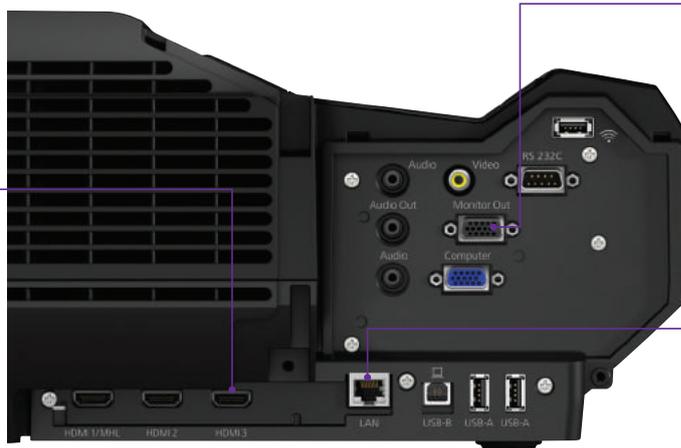

## Practical Functionality, Convenient Connectivity

EH-LS100 only

With enriched network functionality, you can also enjoy stress-free servicing for an ultimate peace of mind.

### Triple HDMI Connectivity

Simultaneously connect up to three different HDMI devices directly to the projector. (Includes one MHL port)

### Home Automation Integration

Easily integrate the projector with home automation systems through the RS-232c port.

### LAN/Ethernet Port

### High-definition Images with 4K Enhancement Technology

4K enhancement technology shifts each pixel diagonally by 0.5 pixels to double the resolution to 3840 x 2160, surpassing full HD image quality to give you unbelievable sharpness, clarity and detail on all your presentations.

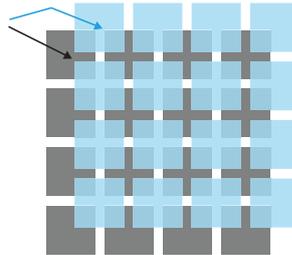

#### Epson 4K PRO-UHD

Delivers an amazing 4K UHD experience with advanced pixel-shifting, resolution-enhancement technology\*.

#### Pixel Scaling

Epson's revolutionary 4K Enhancement Technology shifts each pixel diagonally by 0.5 pixels for twice the vertical and horizontal resolution.

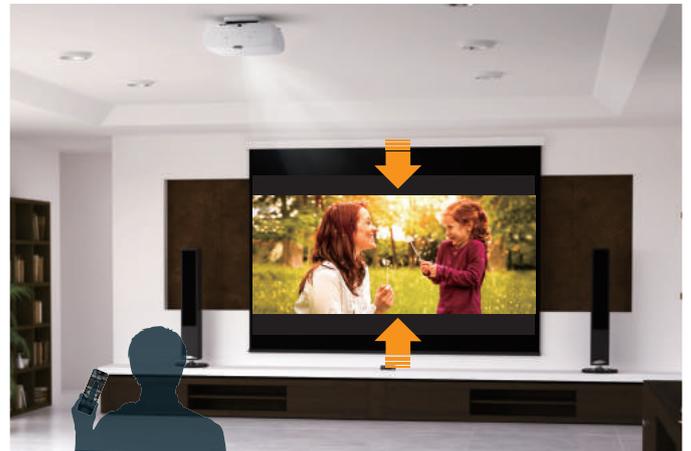

\* 4K Enhancement Technology shifts each pixel diagonally to double Full HD resolution. Resolution is Full HD in 3D Mode.

#### Motorised Lens

Equipped with motorised lens, the projectors allow you to preset up to 10 positions for zoom, focus and lens shift for both standard projections and wide cinema ratios. In short, you can easily change the aspect ratio to fit the type of content you are viewing for an optimal viewing experience.

2.35:1 Cinema Scope Size

## Flexible Installation with Optical Lens Shift

The wide lens shift range of these projectors provides exceptional installation flexibility. A short focal length as little as 300cm is possible with a 100-inch screen. A broad shift range of 96% vertically and 47% horizontally with the optical lens shift function also keeps image deterioration low, allowing you to position your projector at any point in the room.

## Compact Design for Easy Ventilation

These projectors are designed with the air intake and exhaust at the front so that you can easily install them even in narrow spaces. Place them on a bookshelf or close to walls without worrying about maintaining clearance for ventilation.

## Cinema Filter

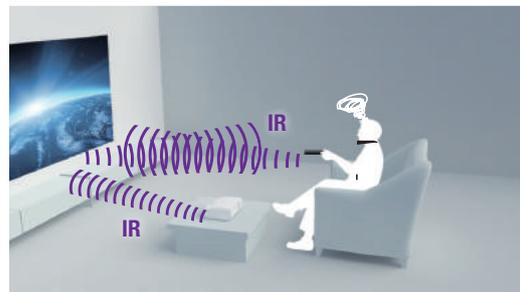

The Epson Cinema Filter extracts very pure hues of the three primary colours from the lamp light to produce a wide colour gamut, enabling unbeatable colour reproduction and quality while maintaining the high contrast ratios that are difficult to achieve with electronic colour-correction.

## Impressive 3D Image Quality

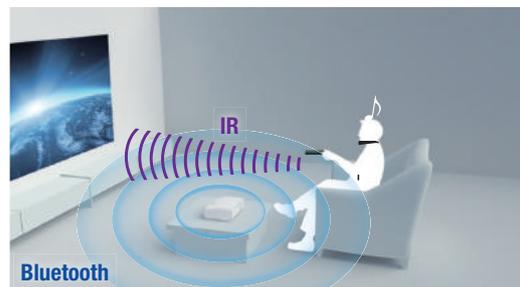

Watch bright and vivid 3D images with high colour brightness of up to 2,400lm for EH-TW7400 and 2,600lm for EH-TW9400.

# PROTECT YOUR PROJECTOR. USE GENUINE LAMPS.

Don't compromise on safety – use Epson genuine lamps to avoid damaging your projector. Eliminate the risk of melting parts of your projector, as well as breaks that result in high-voltage shutdown. With a 0% failure rate even after 2,000 hours of usage – compared to 70% in non-genuine lamps – Epson genuine lamps are safer and more reliable. Choose the best possible viewing experience filled with long-lasting sharpness and colour in every projected image with Epson.

## GENUINE EPSON LABEL

To ensure the best quality and safety when using your Epson Projector, look for the “Genuine EPSON Colour Shifting Label” on your projector lamp. Real quality and value, only with Epson genuine supplies.

## DANGERS OF NON-GENUINE LAMPS

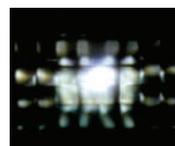

### UNRELIABLE

Counterfeit lamps deteriorate and break much faster than genuine ones.

### UNSAFE

Parts of your Epson projector such as the housing or wires may melt, disconnect, or become damaged when using non-genuine lamps.

### POOR IMAGE QUALITY

Counterfeit lamps may result in inaccurate colour projection, lower brightness levels, as well as flickering images that spoil your viewing experience.

# DEBUNKING THE MYTHS OF HOME PROJECTORS

## 1 A Television is Just as Good as a Projector.

**Why do I need a projector at home when I have television?**

### Truth

Love to watch movies at the cinema for that big-screen, surround-sound experience? Experience the same exhilarating theatre experience in the comfort of your home with our home projectors.

What's more, watching from a projection screen is less stressful on the eyes as the light reflection is not as strong as that of a conventional television screen.

## 2 Expensive Home Projectors and Lamps.

**The projector has a lamp life and it is very costly to change a projector lamp.**

### Truth

Enjoy larger screen size at a pocket-friendlier pricing with our home projectors, which range from US\$xxx to US\$xxx.

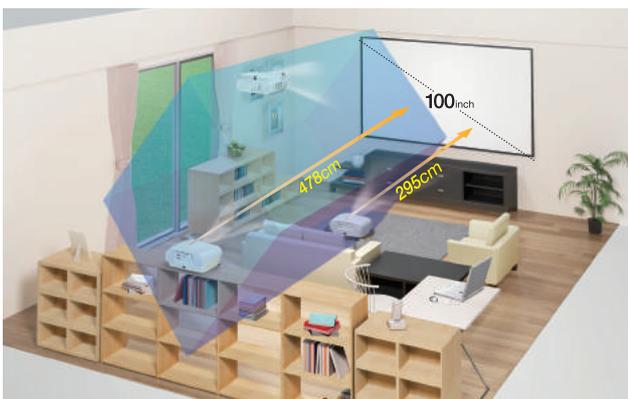

Expensive lamps are a thing of the past, as the cost to replace a lamp is between US\$xxx and US\$xxx. With lamp life of up to 5,000 hours, you will only need to change the lamp after 2.5 years for a 5-hour daily projector usage.

## 3 Projector Screens are Too Big to Use in Small Homes.

**I cannot easily see the whole screen and have to turn my head from left to right to follow the action.**

### Truth

Easily adjust your preferred viewing screen size, ranging from 60-inches to more than 100-inches. With a distance from 0.26m to 3m, you can create a 100-inch screen.

## 4 I Need a Blank Wall.

**I do not have a large blank or white wall that I can use for installing a projection screen.**

### Truth

It is possible to have a pull-down screen or a portable screen which can be kept away when not in use.

## 5 A Dark Room is Needed.

**I need to shut off all natural and electrical light sources to comfortably watch a projection screen.**

### Truth

With white and colour brightness of up to 4,000 lumens in our range of home projectors, you no longer need to darken the room in order to comfortably view what's on the screen.

## 6 Troublesome Installation.

**Installing a projector means a lot of messy cables, especially in a home that is already renovated.**

### Truth

Epson's home projectors can be set up anywhere in a room and can be easily connected to your smart devices.
